

INF 143 Syllabus

Last updated 24.10.09

Lecture notes are available for download at www.kjhole.com/WebSec/Intro.html. This page also contains review questions to help you prepare for the oral exam. You must hand in one written report before this exam.

The lectures are partly based on the textbooks:

C. Adams and S. Lloyd, *Understanding PKI—Concepts, Standards, and Deployment Considerations*, 2nd ed., Addison-Wesley, 2003; Ch. 1-12, 14-16, and 22-27.

The National Research Council, *Who Goes There? Authentication Through the Lens of Privacy*, National Academies Press, 2003; Ch. 1 and 2.

You do not need to buy both textbooks. However, the book on PKI by C. Adams and S. Lloyd is highly recommended. The book on authentication from the National Research Council (in USA) is also a very good source of information. There exists an online version: books.nap.edu/openbook.php?isbn=0309088968

Additional suggested readings will be posted on the bulletin board www.kjhole.com/WebSec/BulletinBoard.html after the course has started.
